

SKN PicoSecond Laser Skin Treatment

What is PicoSecond Laser?

PicoSecond Laser is the first and leading choice of comfortable and convenient for skin revitalization treatments as wrinkles, acne scars and pigment like freckles, sunspots and discoloration. The PicoSecond energy uniquely activates the body's natural cell signaling processes, helping you to achieve and restore a youthful skin by increasing collagen and elastin. PicoSecond with Skin Cell Activation uses pressure to deliver impressive results without the pain, discomfort and downtime of other procedures and all in less time and sessions needed. Skin types treated for all skin types and Fitzpatrick Scale Skin Type I – IV.

PicoSecond revolutionary technology is designed to harness the body's natural healing processes to restore youthful skin in ways never before possible. Instead of building up heat, PicoSecond delivers energy so rapidly in trillionths of a second that tiny particles that make up pigment, wrinkles and acne scar treatment without burning surrounding tissue. Less heat means less tissue damage and discomfort.

Wavelengths	755nm*, 532nm*, 1064nm*
FDA Clearances	Tattoo removal, Benign Pigmented Lesion Removal, Wrinkles & Acne Scar Treatment
Skin Types Treated	All skin types (Fitzpatrick Scale Skin Type I – IV)

How does PicoSecond work?

The PicoSecond deliver energy that works with the body, unleashing natural cell signaling processes to create brighter, healthier, younger-looking skin with virtually no downtime. But only PicoSecond with Skin Cell Activation uses pressure to deliver impressive results without the pain, discomfort and downtime of other procedures and all in less time and sessions needed.

PicoSecond's technology uses a unique wavelength of light (755nm) and a specialized lens to convert laser energy into gentle pressure. This pressure squeezes cells, activating the natural cell signaling processes that create new collagen and elastin without burning or damaging the skin.

PicoSecond's unique energy delivery is a breakthrough for patients' seeking a way to improve their skin and reduce signs of aging but who don't want to deal with the risks, pain and downtime of traditional laser treatments. PicoSecond gently disrupts the particles responsible for a range of pigment conditions like freckles, sunspots and other discoloration.
